### **Electronic Waste (E-Waste)**

E-Waste is used computers, cell phones, TVs, and VCRs. Some materials, such as lead, nickel, cadmium and mercury could pose threats to human health and the environment if mismanaged at their end-of-life. Keeping used electronics out of the landfills, to recover materials and the environmental impacts and energy demands from mining and manufacturing will lengthen the life of the landfill. Recycling electronics recovers valuable materials and as a result, we reduce greenhouse emissions, reduce pollution, save energy and save resources by extracting fewer raw materials from the earth.

If you have any e-waste, call the CIV office, 767-5505 and ask for Daniel Klanott or Pat Warren.

Students can choose to learn Photoshop, Illustrator, Outlook, Microsoft Excel, Microsoft Publisher, Microsoft Word, iTunes and much more. They cover a variety of topics — including surprising ones like public speaking and project management.

If a student is preparing for an internship or job that requires specific software, Lynda can be a helpful place to start learning. Lynda.com helps keep computer skills current as technology changes. **Green Cleaning Tip**

**Wood Cleaning formula**

Combine 1/4 cup white distilled vinegar, 1/4 cup water, 1/2 teaspoon liquid vegetable oil-based soap, a few drops of olive oil, and 3—4 drops of essential oil (optional) in a bowl. Saturate a sponge with the mixture, squeeze out the excess, and test wood surface. Rinse sponge in warm water in between washes.

To remove water spots on wood, allow the spots to dry out completely. Apply real mayonnaise over stain and let stand for at least an hour. Clean and buff with a clean rag.
